Elevate Employee Engagement: CloudApper's AI-Powered Messaging Solutions for UKG

Transform the way you interact with your employees using CloudApper's custom solutions for UKG. Our AI-powered platform offers customizable employee experience solutions that enable organizations to communicate with their employees via SMS, email, or messaging services like WhatsApp. With CloudApper, UKG customers can improve productivity by automating WFM/HCM tasks, more easily accessing data, and fostering communication in a convenient way.

Transform Employee Communication & Automate WFM/HCM Tasks

Employee Self-Service

Automate Alerts

Optimize Shift Management

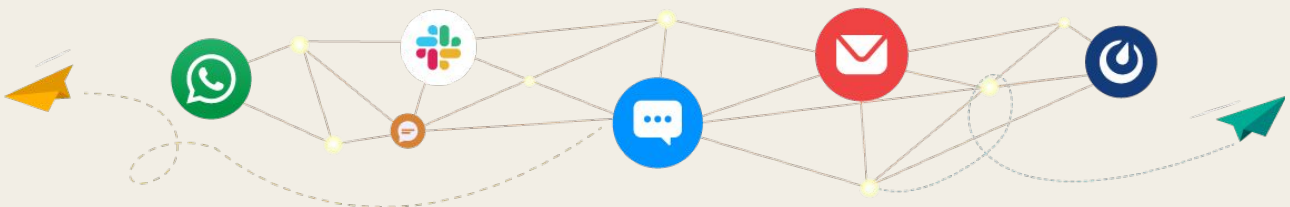

Send Surveys

Our solutions can be customized to automate nearly any function!

We Support All Major Communication Channels, Including:

The biggest advantages of using RightPunch are its ease of use and how cost-effective it is compared to standard biometric time clocks.

Dave Laroche

IT Manager, YMCA-YWCA of Winnipeg Manitoba, Canada

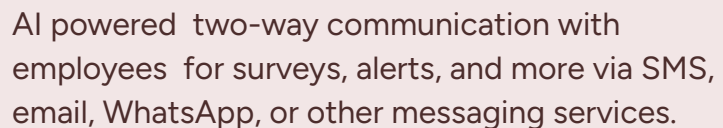

The CloudApper mobile app helps us seamlessly interface with our enterprise HCM system.

Stefanie Swalgen

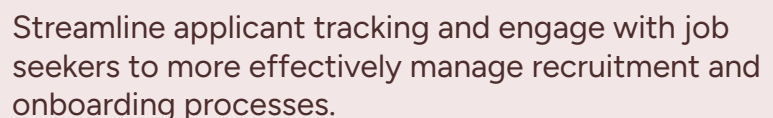

VP of human resources, Potpourri Group

With CloudApper's powerful AI platform, we can deliver custom solutions that help employees more efficiently access data and perform WFM/HCM tasks while streamlining organizational communication. Here are some example use cases:

Enable employees to easily submit time, check schedules, take PTO, and more through natural SMS conversations.

Manage and optimize employee shifts by allowing them to bid for shifts, swap shifts with colleagues, and bid for vacation.

Benefits of Using CloudApper Employee Experience Solutions for UKG

Improved Accessibility

Our solutions make it easier for employees to access information and perform WFM/HCM tasks. They can access and update data, receive auto-alerts, and work more efficiently without apps or logins via SMS, WhatsApp, Slack, etc..

Seamless Integration

CloudApper's solutions seamlessly integrate with UKG Workforce Central, Ready, Dimensions, and Pro. With a simple installation and setup process, our team can have you up and running within a few minutes!

Faster Communication

With CloudApper, communication between employees and managers is faster and more efficient. Employees can receive important real-time alerts and notifications, ensuring they are always up-to-date with the latest information.

Frees Up HR Teams

CloudApper's solutions empower HR staff by automating routine tasks, enabling them to focus on strategic activities and fostering self-service capabilities for employees.

Improved Employee Engagement

Our solutions improve employee engagement and satisfaction by giving employees control over their HR and WFM processes. When employees can more easily access data and execute tasks, they feel more engaged and empowered in their work.

How Does CloudApper Work?

Our solution specialists use CloudApper to efficiently make your software without writing a single line of code. Our platform utilizes AI to automatically create the software and simplify any customization needs.

Pitch your software requirements to our solution experts.

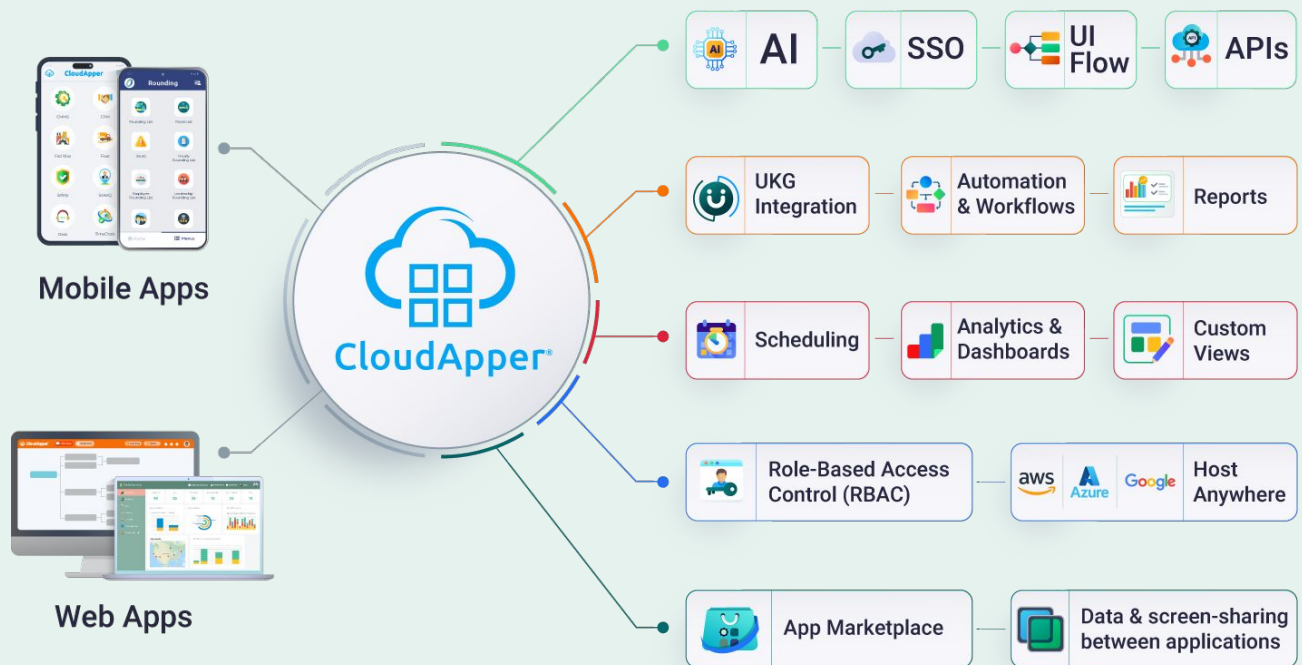

A solution specialist develops the software automatically using AI.

Your solution is delivered within days to boost your ROI.

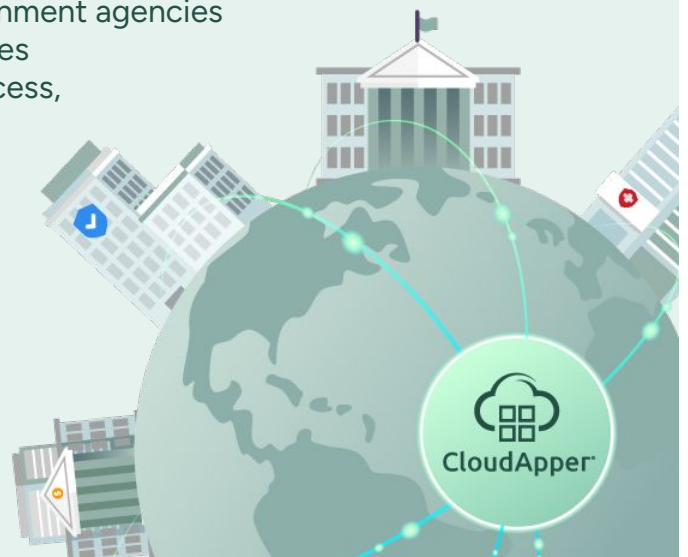

An Enterprise-Grade Platform

Not only does CloudApper create software automatically, it also includes every element that's necessary to deliver modern, feature-rich applications. From analytics dashboards to robust reports to complex workflow automation and system integration, our experienced team can leverage CloudApper to make the software you need without the added complexity of having to write, manage, and compile software code.

Project & Support Services

Our team has 20 years of experience working on large enterprise software deployments with companies and government agencies around the world. We provide "white glove" services through our account management, customer success, solution specialist, and technical teams. We have resources around the world to provide 24/7 customer support.
