

Text to Apply

Simplifying Job Applications for a Smoother Hiring Experience

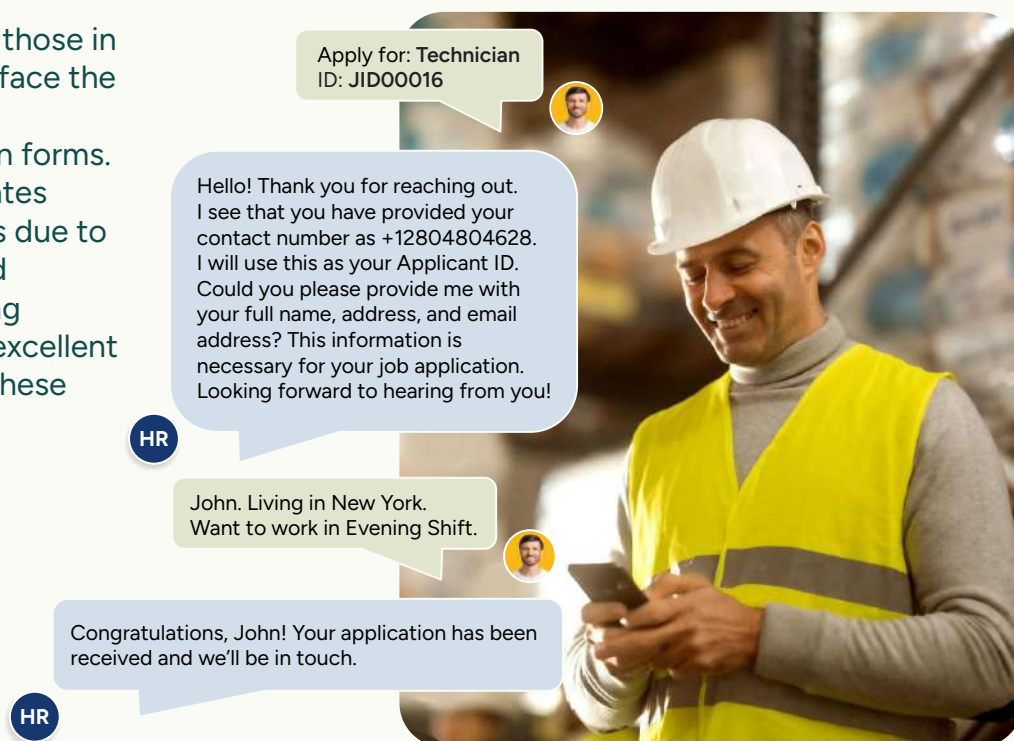

Works With UKG:  Pro &  Ready

Are you tired of missing out on qualified candidates due to a tedious and complex job application process? Introducing CloudApper Text to Apply – the innovative solution that transforms the way blue-collar employees apply for open positions. Say goodbye to lengthy forms and hello to a streamlined, AI-powered conversational application experience that enhances your hiring process.

The Problem We Solve

Job seekers, especially those in blue-collar roles, often face the challenge of navigating complicated application forms. Many potential candidates drop out of the process due to its time-consuming and frustrating nature. Hiring managers miss out on excellent prospects because of these barriers to entry.

The Solution: CloudApper Text to Apply

CloudApper Text to Apply revolutionizes the application process by offering a user-friendly and efficient way for candidates to apply for open jobs. Here's how it works:

Conversational Interaction: Candidates scan a QR code or submit some basic information from a job posting webpage (e.g. name & mobile number) to start the application process. CloudApper hrGPT then engages with the candidate in natural language conversations to gather the necessary information, making the application process feel like a friendly chat.

Automated Data Collection: No more lengthy forms to fill out! CloudApper hrGPT intelligently collects the required applicant information through conversational prompts. This data is seamlessly compiled and organized, saving time and effort for both candidates and hiring teams. Data is automatically synced to the candidate record in UKG.

Effortless Applications: CloudApper Text to Apply simplifies the journey for job seekers. They can provide essential details, work experience, and preferences through interactive conversations. The process is intuitive, engaging, and hassle-free.

Enhanced Hiring Efficiency: Hiring managers benefit from a more efficient screening process. With accurate and organized data, they can quickly identify qualified candidates, streamlining the selection process and reducing the risk of overlooking potential hires.

Integration with UKG Pro & Ready: All applicant data collected through CloudApper Text to Apply is seamlessly synced with the UKG Pro & Ready Recruiting modules. This integration ensures that your candidate pool is always up to date, enabling a seamless transition from application to evaluation.

Why Choose CloudApper Text to Apply?

Accessibility: Reach a wider pool of candidates by offering an easy-to-use application process that appeals to job seekers of all backgrounds.

Time Savings: CloudApper hrGPT eliminates the need for time-consuming form filling, speeding up the application process for both candidates and hiring teams.

Engagement: Engage candidates with conversational interactions that create a positive impression of your organization and its commitment to a user-centric experience.

Accurate Data: Say goodbye to manual data entry errors. CloudApper Text to Apply ensures accurate and well-organized candidate information.

Improved Hiring: Enhance your hiring efficiency and attract the best-fit candidates by removing barriers to application.
