

Making HR Information Available at the Fingertip of Frontline Employees!

Problem Solving with hrGPT: Streamlining HR Activities for UKG Customers

hrGPT improves engagement by enabling employees to easily access personalized data and perform HR tasks through AI-powered messaging. hrGPT seamlessly integrates with UKG, enabling organizations to unlock new possibilities and drive sustainable success in their HR operations.

Reduces Stress on HR Teams

hrGPT for UKG alleviates additional burdens by automating time-consuming HR tasks, allowing HR professionals to focus on strategic initiatives and crucial tasks.

Improves Employee Engagement

hrGPT empowers employees to access HR information, execute tasks, and submit requests through natural language interactions - improving employee engagement.

24/7 AI Assistant

hrGPT is an on-call AI assistant that provides employees with robust support, enabling them to access data, submit requests, and receive assistance instantly.

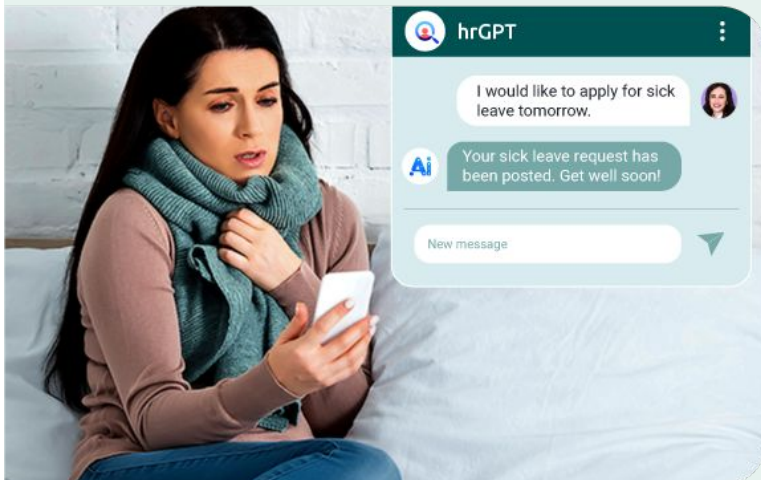

Optimizes Costs

hrGPT reduces the need for manual interventions from HR teams for basic tasks - optimizing resource allocation, boosting productivity, and reducing costs for UKG users.

What's my PTO balance?

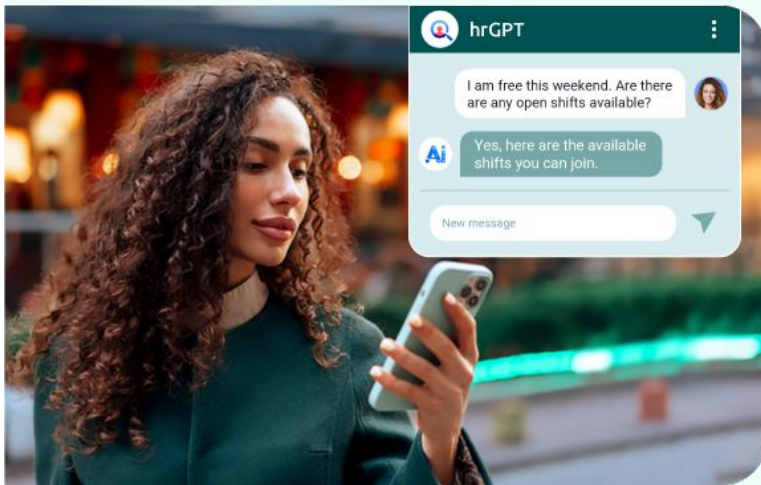

Here's your available PTO:

Vacation: **160 hours**
Personal: **0 hours**
Sick: **0 hours**

Personalized Responses

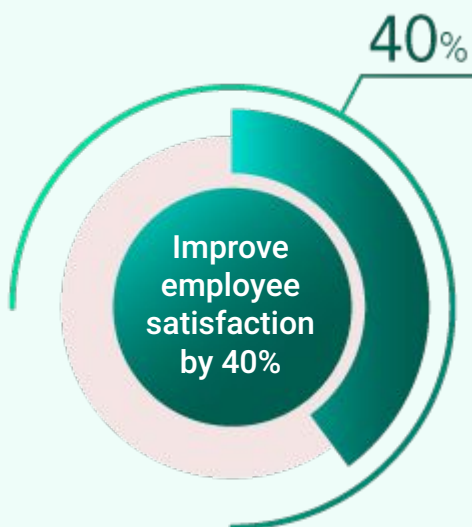

Quickly and easily deliver real-time, personalized answers to any employee inquiries about HR policies, benefits, and compensation details to enhance communication and engagement.

Effortless Shift Coordination

AI-powered conversations simplify shift management by allowing employees to access schedules, request time off, bid for open shifts, and swap shifts with colleagues.

CloudApper's AI-Powered hrGPT for UKG

Transform your employee experience with CloudApper's AI-powered custom solutions for UKG. Users simply talk to our system in their own natural language to streamline tasks, simplify data access, and improve decision-making. Boost productivity with seamless HCM automation and AI-driven processes for a more efficient workforce.

Let's put AI to work for HCM

Benefits of Using CloudApper hrGPT for HCM Automation

Enhanced Employee Self-Service

Empower employees with AI-powered self-service that helps them execute HR tasks. Employees can request PTO, access schedules, view accruals, submit time punches, and more through natural messaging interactions.

Easily Customizable

hrGPT easily adapts to your evolving workforce, policies, and systems - making it the ideal AI assistant for your employees that is tailored to specific business needs of customers.

Simplified AI Integration

hrGPT is not a basic chatbot - it's powered by a holistic platform that simplifies AI integration into enterprise systems like UKG, keeps you on the cutting edge, and orchestrates all workflows seamlessly.

Personalized HR Policy Requests

CloudApper hrGPT utilizes AI to understand employees' diverse requests and easily aligns them with your organization's HR practices - delivering personalized and accurate responses.

Automated Workflows

hrGPT reduces manual processes by automating workflows easily. The solution processes actions automatically in response to employees' questions, requests, and requirements - boosting operational efficiency.
