**The YMCA-YWCA of Manitoba
is using CloudApper RightPunch
for UKG Dimensions to implement
face ID for time collection.**

Integration: UKG Dimensions

Customer: YMCA-YWCA of Manitoba

Location: Winnipeg, Manitoba, Canada

Client Profile

The YMCA-YWCA of Manitoba is a charitable organization that has been helping people of all backgrounds, ages, and abilities. The organization strives to ensure that no child is left out and that every family has access to its facilities and programs. As a result, It has provided thousands of children and adults with programs and services dedicated to personal growth and community development. It also provides support programs to its communities to address social and health issues. YMCA-YWCA welcomes anyone and everyone and helps them become better individuals, as well as makes the community a better place.

RightPunch Face Matching App For UKG Dimensions

Touchless employee time capture for the YMCA-YWCA of Manitoba

Challenges

The YMCA-YWCA of Manitoba employs over 500 employees across its facilities that focus on serving and building healthy communities. Managing such a large and diverse workforce is a significant challenge in itself. Also, the charitable organization was using a physical employee time clock that reached its EOL (end of life). As a result, it was searching for a reliable replacement for its almost obsolete employee time clock to capture punch-ins and punch-outs. The YMCA-YWCA of Manitoba sought to implement a solution that is cost-effective, easy to integrate and implement, and can accept employee punches without physical contact.

Solution

After conducting extensive research for a viable solution, the YMCA-YWCA of Manitoba chose CloudApper RightPunch - an affordable and simplified time capture solution for UKG.

They chose the face-matching configuration as touchless biometric punch-ins were one of their priorities. The organization wanted employees to have minimal contact with devices due to the pandemic. Moreover, the RightPunch solution is cost-effective - UKG employee time clocks are expensive whereas RightPunch works with any tablet device. Finally, the employee time capture solution seamlessly integrates with UKG Dimensions - making it a perfect fit for the YMCA-YWCA as it meets all of their requirements.

To submit punches, the RightPunch solution requires employees to simply take their picture using off-the-shelf tablets that are set up across the facilities. With RightPunch, the YMCA-YWCA of Manitoba ensures that employees can easily punch in and punch out without any physical contact. Since it's a biometric solution, RightPunch prevents employee time theft and buddy punching.

RightPunch Face Matching App For UKG Dimensions

Touchless employee time capture for the YMCA-YWCA of Manitoba

Benefits

With RightPunch, the YMCA-YWCA consistently and reliably identifies its employees using the robust face-matching system. Since RightPunch works with any tablet, the solution is affordable, easy to implement, and seamlessly submits punch data to UKG Dimensions. Moreover, it is easy to use as employees just need to look at the camera to submit punches.

- Affordable alternative to UKG time clocks

About CloudApper

CloudApper is a no-code app mobility platform that empowers organizations to work more smarter and faster from their mobile devices. We enable employees to access enterprise data through a single mobile app and act on it through customized modules and workflows. With CloudApper, you can modernize your digital ecosystem and supercharge employee productivity by enabling them to perform tasks from their phones - improving responsiveness, saving time, and increasing the bottom line.

Dave Laroche

Manager, Information Systems
YMCA-YWCA of Winnipeg

"The biggest advantages of using RightPunch are its ease of use and how cost-effective it is compared to standard biometric time clocks."
