Data Driven Decision Making Challenges

There are several challenges that UKG customers may face when it comes to data-driven decision making without a custom reporting tool:

Difficulty in extracting meaningful insights

UKG solutions collect a lot of data, but without the right tools, it can be hard to draw conclusions.

Lack of flexibility

UKG solutions provide preconfigured reports that may not satisfy an organization's needs. Custom reporting tools provide for organization-specific reports

Inability to automate processes

UKG solutions lack automation for data processing. Custom reporting tools automate these processes.

Difficulty in monitoring compliance

UKG solutions lack compliance monitoring. Custom reporting tools help organizations monitor compliance and take action promptly.

Difficulty in visualizing data

UKG solutions lack data visualization capabilities. Custom reporting tools provide powerful visualization to help organizations better understand their data.

Over 70% of companies use people analytics to improve their performance

- Deloitte report

45% of companies are still in the initial stages of basic process automation

- Software Suggest

80% of HR employees surveyed found that using HR technologies improved employee attitude toward the company

Build Custom Reports With Metrics That Matters

CloudApper provides a no-code platform for UKG customers to build custom reports for data-driven decision making, extract insights from UKG data, automate processes and monitor performance. The platform also offers powerful data visualization capabilities. It helps UKG customers to unlock the full potential of their data and streamline operations.

Advantages of Custom Reporting

Extracting meaningful insights

Custom reporting allows organizations to organize and filter data, identify patterns and trends, and identify areas of strength and improvement.

Flexibility

Custom reporting enables creating reports tailored to the organization's specific requirements, especially important for regulated industries.

Automation

Custom reporting can automate processes such as data collection, data analysis, and report generation, which can save time and improve efficiency.

Compliance monitoring

Custom reporting can help organizations to monitor compliance with laws and regulations, which is important for organizations that operate in highly regulated industries.

Data visualization

Custom reporting can provide powerful visualization capabilities that can help organizations to better understand their data, which can be critical for making informed decisions.

Tracking specific metrics

Custom reporting can help organizations to track specific metrics that are important to them, such as employee turnover or compliance with regulations, which is important for monitoring performance over time.

90% of managers reveal that their teams' productivity and attitudes drive their company's earnings.
