Elevate Your Frontline With hrPad for UKG

Utilizing cutting-edge GenAI, we empower your business to effectively nurture and expand your frontline operations. In addition to handling all common time management and self-service functions, our solution tackles critical challenges leading to employee turnover and costs, including system exploitation, compliance issues, staff shortages, and operational disruptions. Plus, **hrPad is 100% customizable** to meet specific customer needs!

✓ Your punch has been saved successfully.

Timekeeping & Employee Self-Service

Capture time, attestations, labor transfers, and perform self-service functions from any tablet. All the features of a traditional time clock at a fraction of the cost!

Reduce Stress - 24/7 AI Assistant

Ensure that your frontline staff has easy access to information. With the hrPad AI assistant, they can access and find any policy data, submit requests, and seek assistance 24/7.

On a scale of 1 to 5, how much do you like your job?

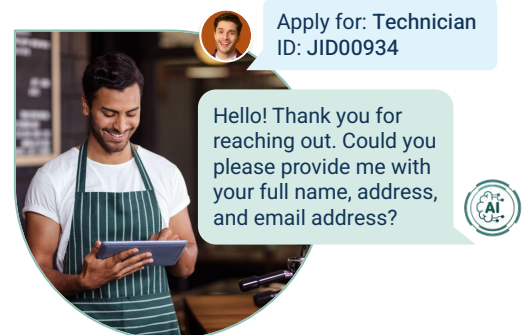

Improve Retention

Utilize personalized **surveys** to collect valuable insights for job satisfaction, employee well-being, and more for continuous improvement.

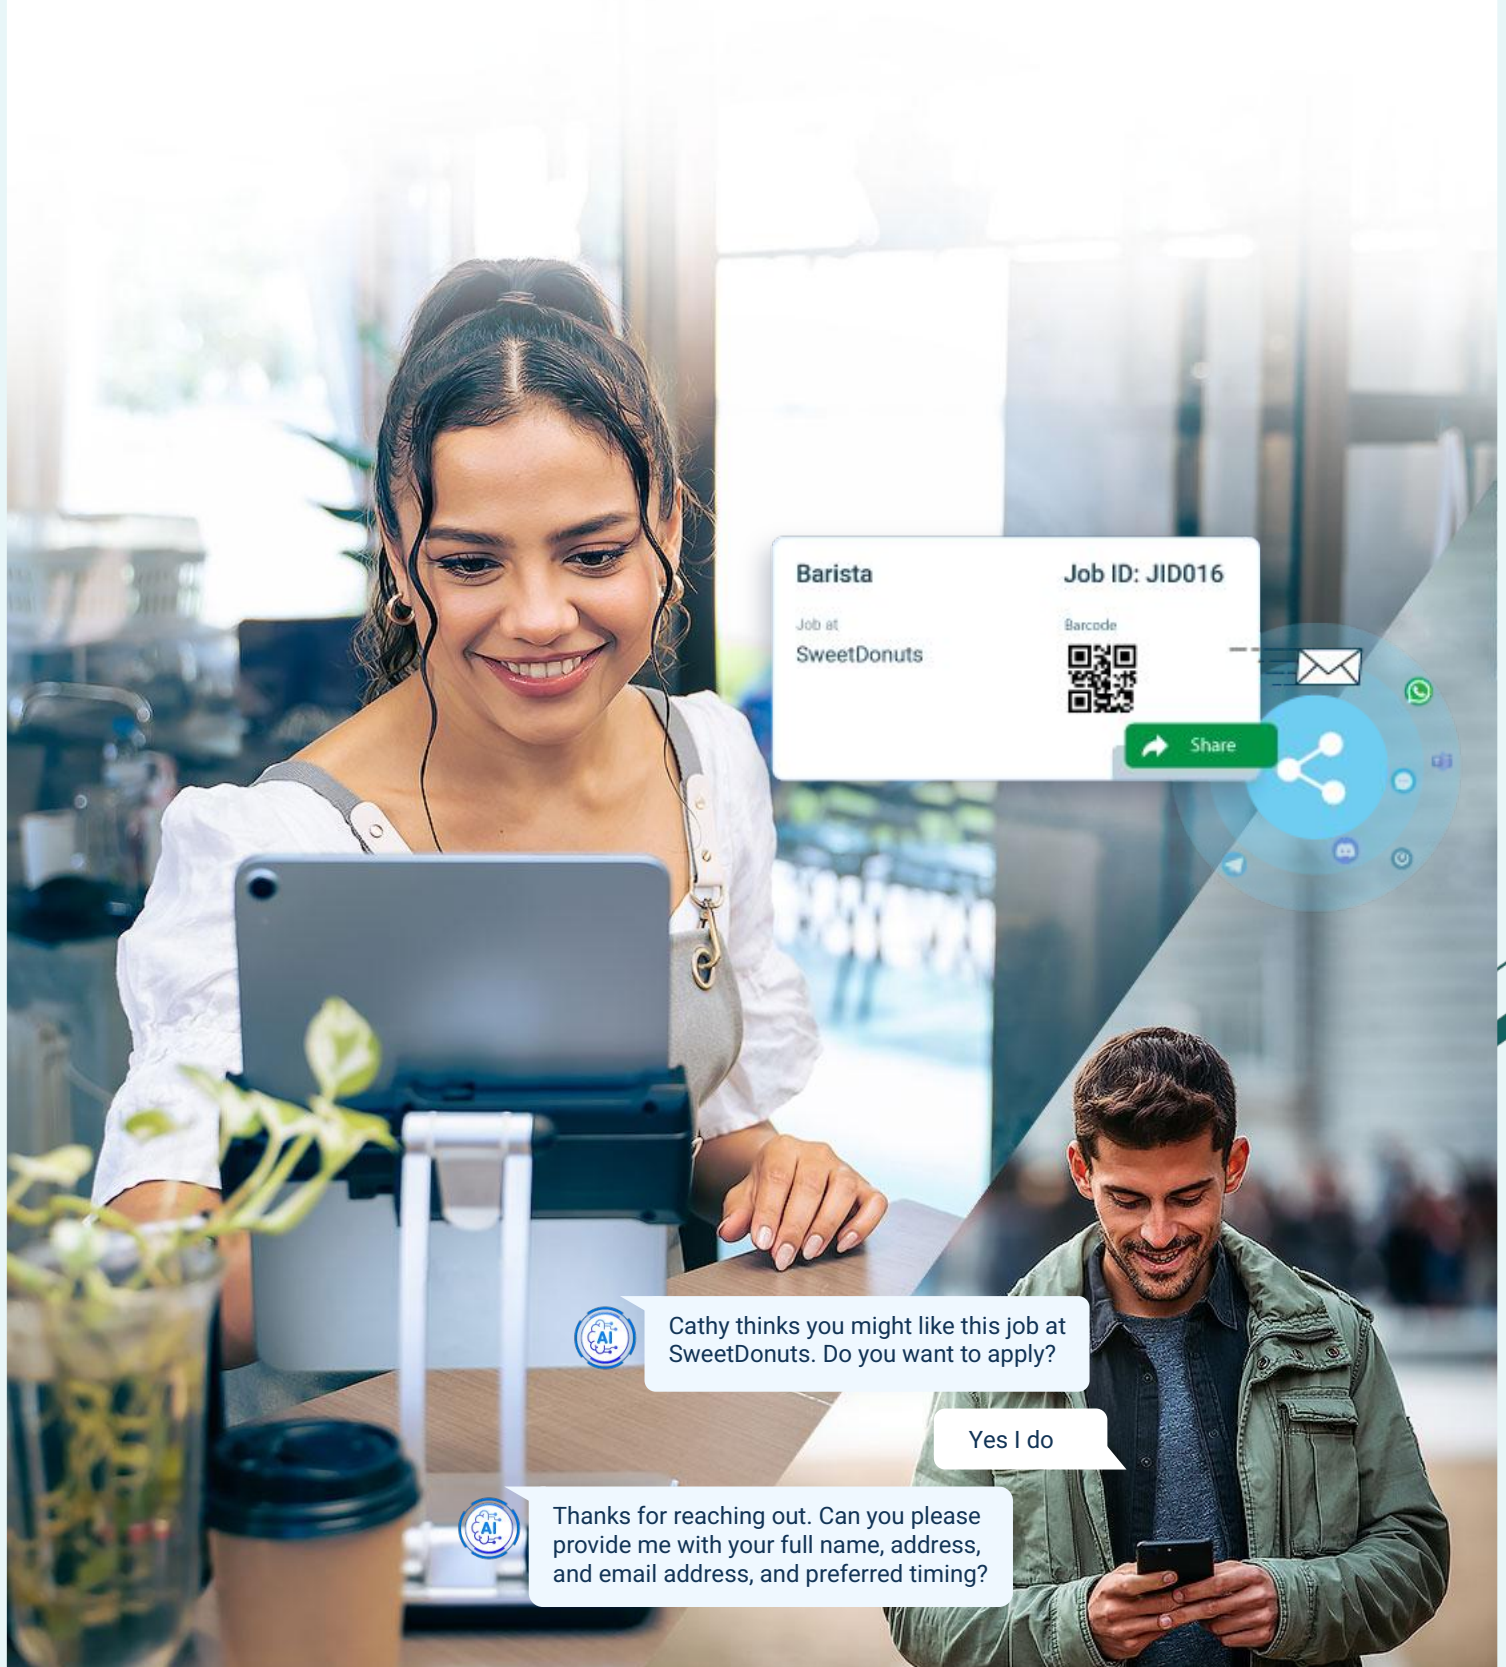

Recruit Through Existing Employees

hrPad allows existing employees to send active open positions to their friends and family networks. The entire recruitment process is done through an AI-driven **text-to-apply** process.

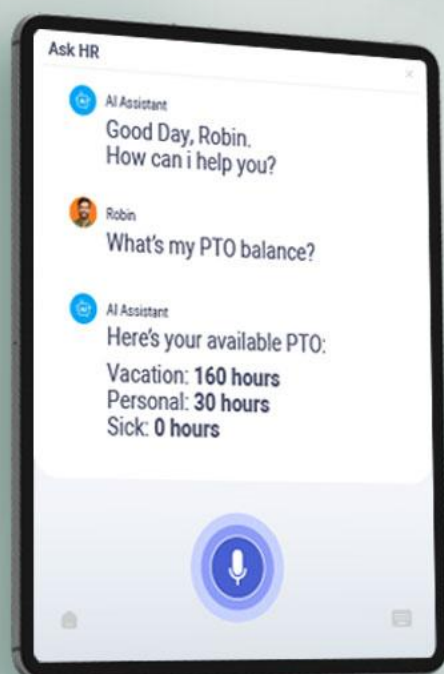

hrPad streamlines recruitment by enabling employees to browse open jobs and refer friends or family members, lowering recruiting costs. The AI-driven solution also simplifies job applications for smoother hiring by replacing lengthy forms with a conversational experience. hrPad creates a frictionless journey for candidates and HR teams, transforming recruitment, ensuring efficiency, and improving engagement.

24/7 AI Assistant to Support Employees

hrPad for UKG boosts the employee experience by offering a seamless self-service solution through its AI assistant. Customers can easily train the AI on any corporate data - HR policies, compliance procedures, benefits information, etc. The solution provides personalized and accurate responses to employee queries and processes requests around-the-clock, helping to reduce the HR burden and improve employee engagement.

Time Capture for Ensuring Compliance and Fair Pay

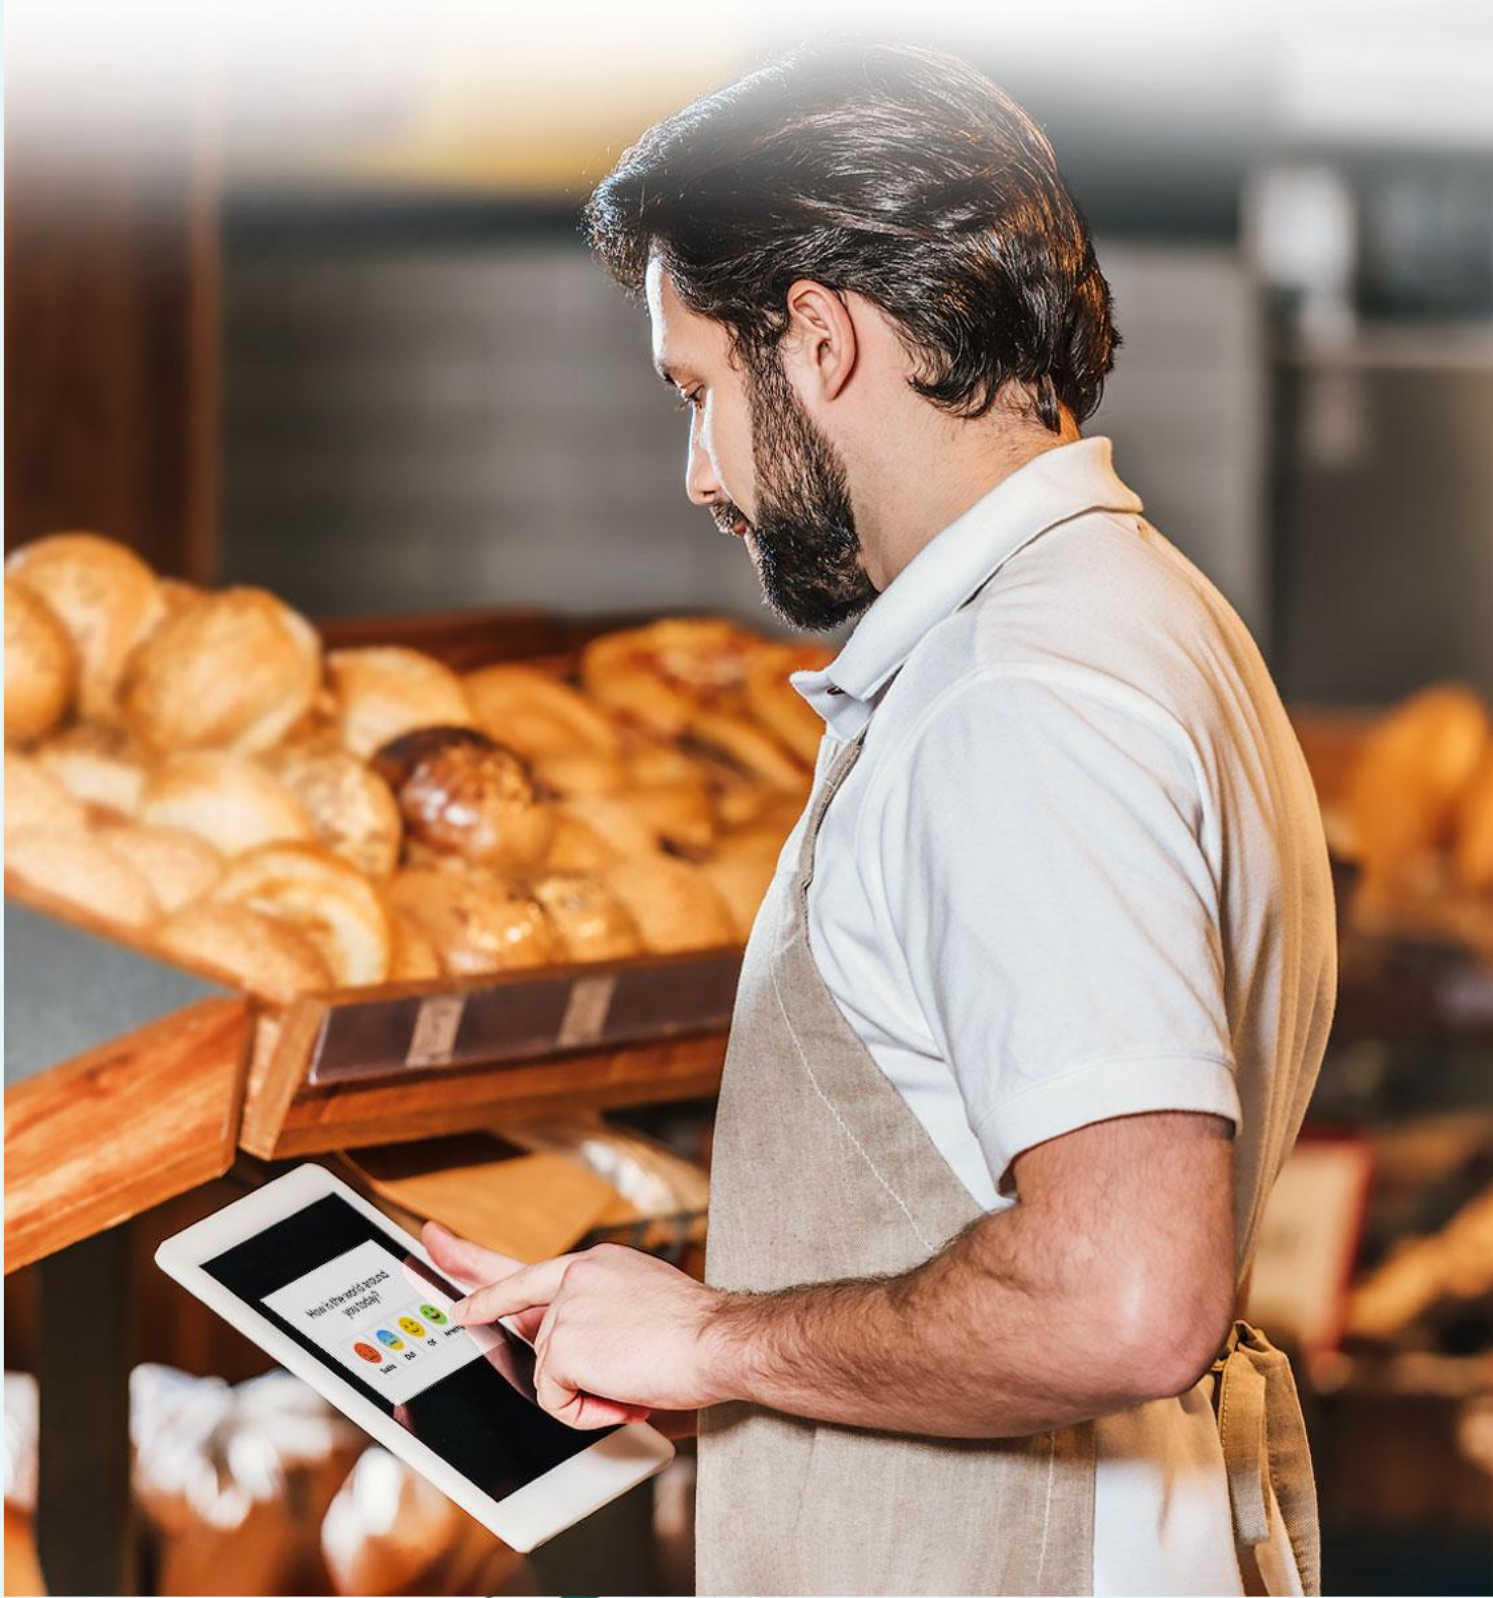

Knowing who submits time data is vital for security, compliance, and payroll. hrPad ensures that employees are present at the job site, mitigating legal risks for businesses and promoting transparency and equity in compensation by adhering to labor laws and union agreements. The time capture data is sent to UKG automatically - creating a seamless experience for HR teams. hrPad also supports features like attestation and cost center transfers, as well as all employee self-service functions - **all at a fraction of the cost of traditional time clocks!**

Conduct Surveys and Capture Custom Data

hrPad helps integrate surveys into employee clock-in and clock-out routines. HR teams can set up custom questions or use AI to generate questions automatically to gauge anything - from job satisfaction to employee well-being. It can also be used for attestations, asking employees questions during clock-outs to ensure compliance. This flexibility aids in capturing essential employee data, enabling a deeper understanding of employee sentiment, streamlined feedback collection, and ensured compliance.

A man with a beard, wearing a white polo shirt and a tan apron, is standing in a bakery. He is holding a tablet computer and looking at the screen. The screen displays a survey interface with the text "How are you feeling today?" and five colored circular buttons (red, yellow, green, blue, and purple) labeled "Not at all", "A little", "Somewhat", "Quite a bit", and "Very much". In the background, there are wooden shelves filled with various types of bread, including round loaves and braided breads. The lighting is warm and focused on the man and the bread.
