Case Study

Capano Management Chooses CloudApper for UKG Dimensions To Automate Employee Tip Recordkeeping, Job Transfer, and Punch Submissions.

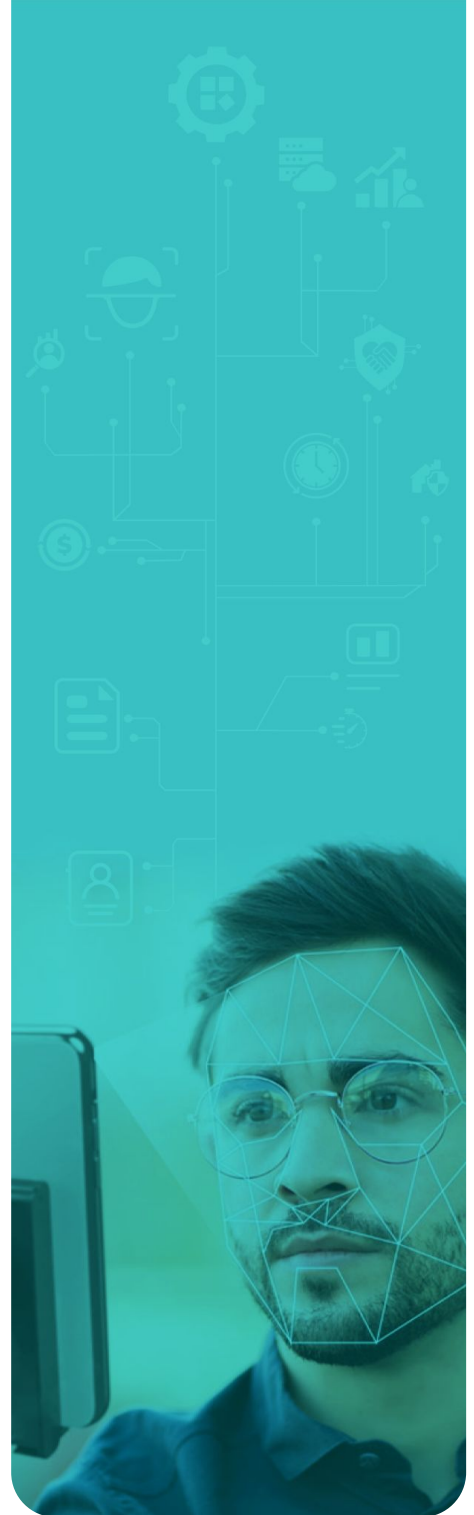

Integration: UKG Dimensions

Customer: Capano Management

Client Profile

CAPANO

M A N A G E M E N T

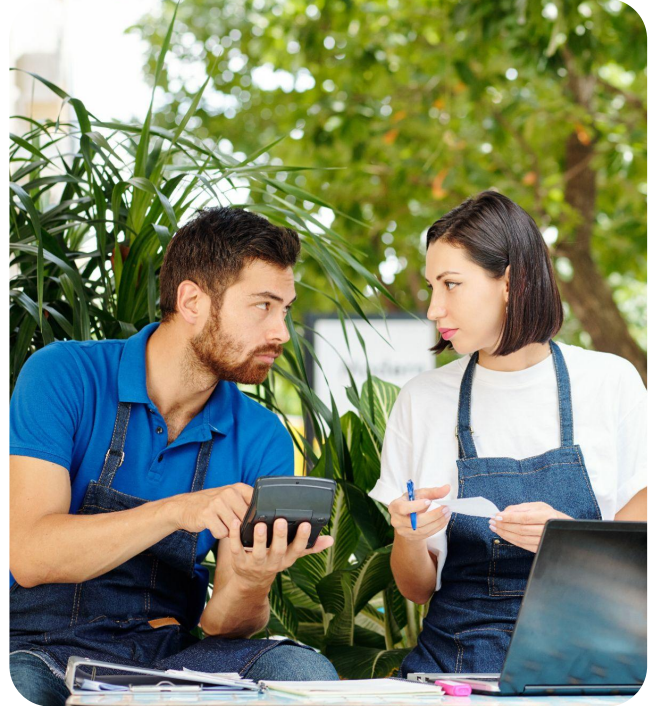

While Capano Management is primarily a real estate development company serving its community for over 75 years, it also operates in diverse verticals such as hospitality, construction, and others. It has several multi family residences in Delaware, Pennsylvania, Maryland, and Florida, commercial spaces for retail stores and offices, multiple restaurants, and construction projects - making Capano Management a truly diversified company operating in the US.

Capano Management Chose CloudApper for UKG Dimensions To Automate Tip Recordkeeping, Job Transfers, & Punch Submissions

Challenges

Capano Management employs over 300 employees across its restaurants to serve customers. The organization was facing primarily three challenges at its restaurants. Firstly, employee clock ins and clock outs were becoming a hassle and expensive - they needed an affordable solution. Secondly, employee tip recordkeeping was becoming difficult - they needed error-free records for IRS compliance. Moreover, the organization was having a difficult time tracking employees in different roles or locations. Capano Management was looking for a custom solution that could capture employee punches, employee tip data, and job transfer data - all of which will automatically be sent to UKG Dimensions.

Solution

After searching for a viable solution, Capano Management chose CloudApper RightPunch - an affordable and simplified time capture solution for UKG which was customized to meet their additional requirements.

Capano Management chose the face-matching configuration for simplified employee punches. Moreover, when employees punch out, a pop-up asks them about their tip amount, automating employee tip recordkeeping. Finally, for employees that need to work at other locations or multiple tasks, the custom solution also enables them to submit transfer punches. The custom RightPunch solution sends all of the data to UKG Dimensions automatically - fulfilling all of Capano Management's requirements.

To submit punches, the customized RightPunch solution requires employees to simply take their picture using off-the-shelf tablets that are set up across the restaurants in 19 stations. With RightPunch, Capano Management ensures that the employees can easily punch in and punch out, declare their daily tips, and submit transfer punches if they are assigned to different jobs or locations.

Benefits

With the customized RightPunch solution, Capano Management consistently and reliably records employee tips, identifies employees using the face-matching system, and keeps records of job transfers. Since RightPunch works with any tablet, it is affordable, easy to implement, and submits punch data to UKG Dimensions automatically. Moreover, employees just need to look at the camera to submit punches and declare tips.

- Affordable alternative to UKG time clocks
- Works with any Android or iOS device
- Add customizations like job transfers, attestations, tip submissions, and more
- Works with UKG Central, Dimensions, Ready, and Pro
